

## Growing

We want pupils to develop the confidence to create, play and perform music, and develop the skills to appreciate a wide variety of musical forms.

## Resilient

Learning to play a new instrument can be challenging.. We want all children to be confident by performing and stepping outside of our comfort zone.

## Head, Heart, Hands

Pupils will be encouraged to develop a positive mind-set, by listening to a range of music.. Listening, making music and playing musical instruments is beneficial to mental, physical and emotional health. Pupils will develop the confidence to 'just give it a go'

## Music INTENT

## Opportunities

Pupils will be exposed to different music from the world. They will have the opportunity to play instruments and perform in front of audiences. Children also have the opportunity to take part in music sessions led by outside agencies.

## Team Work

Each lesson should incorporate opportunities for paired and group work .  
Children can experience live performances and an opportunity to work collaboratively as musicians.

## Wonder

The world is full of awe and wonder. We try to make the most of our instruments we have in school. Wonder is further developed through performances inviting parents and grown ups into school.
